Summary

Backend-focused Computer Science (AI & ML) student with hands-on experience building scalable Java applications using Spring Boot, Hibernate, PostgreSQL, REST APIs, and React.js. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and Software Engineering, with experience developing secure, full-stack applications using JWT authentication, RBAC, and modern development tools. Passionate about designing reliable, high-performance software and solving complex engineering problems.

Education

JECRC University, Jaipur

2024 – 2028

Bachelor of Technology in Computer Science (AI & ML) — CGPA: 9.37/10

Technical Skills

Programming Languages: Java, C++, Python, JavaScript

Backend: Spring Boot, Spring MVC, REST APIs, JDBC, Servlets, JSP, Hibernate, Spring Data JPA, Maven, JUnit, JWT Authentication, RBAC, API Security

Database: PostgreSQL, MySQL, SQL, Firebase, Redis

Tools & Platforms: Git, GitHub, Postman, Docker, Swagger/OpenAPI, IntelliJ IDEA, Eclipse IDE, VS Code

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

Research & Development Intern

Apr 2026 – May 2026

College of Aviation Technology, National University, Dhaka, Bangladesh

- Conducted research on Urban Air Mobility(UAM), autonomous aerial transportation, and intelligent aviation systems.
- Explored integration of AI, cloud computing, and smart mobility technologies in future aviation infrastructure.
- Worked on technical research documentation and innovation-focused analysis for emerging aviation technologies.

Projects

SkillGraph – Developer Identity Platform | *Java, Spring Boot, Spring Security, React.js, TypeScript, MySQL* | [GitHub](#)

- Built a full-stack Developer Identity Platform enabling users to create verified technical profiles using Google and GitHub OAuth2 authentication.
- Developed secure REST APIs using Spring Boot, Spring Security, JWT, Hibernate, and MySQL following a modular feature-based architecture.
- Integrated GitHub APIs to synchronize repositories, projects, skills, and developer profiles with automated data synchronization.
- Implemented DTOs, global exception handling, validation, file uploads, and Role-Based Access Control (RBAC) for a scalable backend.

Badri Apparels – Full Stack E-Commerce Platform | *Java, Spring Boot, React.js, PostgreSQL* | [GitHub](#)

- Developed a scalable e-commerce platform with authentication, admin dashboard, cart, order management, and payment integration.
- Built 25+ REST APIs using Spring Boot with Hibernate and Spring Data JPA integrated with PostgreSQL.
- Integrated Razorpay & Cashfree payment gateways with UPI verification, API security, and payment status handling.
- Implemented JWT Authentication, Role-Based Access Control (RBAC), and a responsive frontend using React.js and Tailwind CSS.
- Containerized backend services using Docker and followed modular backend architecture for scalability.

Mind Saarthi – AI Mental Wellness Assistant | *Python, NLP, Machine Learning* | [GitHub](#)

- Developed an AI-powered mental wellness assistant with chatbot interaction and sentiment analysis features.
- Built scalable backend services in Python for intelligent response generation and emotion detection workflows.
- Processed and analyzed user interactions using NLP techniques to improve conversational accuracy.

Achievements

- Solved 350+ Data Structures & Algorithms problems across LeetCode and Striver Sheet, strengthening problem-solving and algorithmic thinking.
- Ranked among the Top 5 students in a class of 60+ students, maintaining a CGPA of 9.37/10 in B.Tech Computer Science (AI & ML).
- Built multiple full-stack applications using Java, Spring Boot, React.js, PostgreSQL, and modern backend technologies, implementing secure authentication, REST APIs, and scalable architectures.

Certifications

- Spring Boot 3, Spring Framework 6 & Hibernate – Udemy
- GitHub Foundations – GitHub
- Data Structures & Algorithms (C++) – Apna College
- Python Programming – Udemy
